PYTHON DEVELOPER | BACKEND DEVELOPER | DATA ANALYST (ENTRY-LEVEL)

Hardworking and passionate Python developer with strong analytical and problem-solving skills. Eager to take on an entry-level developer or data-focused role while contributing to team goals and building impactful solutions.

EDUCATION

Masters of Computer Applications | 2023-2025

- Jain College of Engineering, Belagavi Karnataka

Bachelors | September 2021

- Bachelors of Commerce| L. K. Khot College, Sankeshwar Karnataka

EXPERIENCE

Software Development Intern | XCEL CORP, Belagavi

- Gained hands-on Experience in Software development and worked on real-world projects
- Assisted in backend development using python
- Worked alongside senior developers in debugging and optimizing the applications

Tech Stack: Python, MySQL, Django.

PROJECTS

AI Video Script Generator

- Built AI Scriptwriter, a web app for creating video scripts for education, marketing and other content formats.
- Designed a customizable script engine supporting tone, audience targeting and multilingual output (English, Kannada, Hindi)
- Added instant script generation, bookmarking, and text-to-speech capabilities, delivering a smooth user workflow with persistent local script management.

Tech Stack: Python, JavaScript, HTML/CSS, LLM integration.

IOT Smart Village Street Lightning System

- Built an IoT-based Smart Village Street Lighting System that automates streetlight operation for rural areas.
- Implemented ambient-light and motion-sensing modules using microcontrollers to enable adaptive, energy-efficient lighting
- Improved power efficiency and enhanced public safety through automated, sensor-driven illumination

Tech Stack: Sensors, Embedded C, IoT Modules

SKILLS

- Programming: Python (OOP, REST APIs)
- Libraries: Pandas, NumPy
- Databases: SQL, MySQL
- Web: HTML, CSS
- Soft Skills: Communication, Problem-Solving, Leadership

CERTIFICATES

- Python Fundamentals
- Cyber Security and Privacy

Languages: Kannada, English, Hindi
